Education

University of Missouri – St. Louis | Expected: December 2027 | St. Louis, Missouri

Bachelor of Science in Cybersecurity, Information Technology Emphasis | GPA: 4.0/4.0

- **Relevant Coursework:** Cloud Security for Business, Networks and Security, Introduction to Information Security, Database Management Systems, Introduction to System Administration, Computer Organization and Architecture, Programming and Data Structures
- **Certifications:** Microsoft Certified: Azure Fundamentals (AZ-900) | Identity and Access Administrator Associate (SC-300, In Progress)
- **Awards/Honors:** Cybersecurity/IT Outstanding Student Award (Spring 2025), Dean's List (All Semesters)

Work Experience

Fabick CAT | Fenton, Missouri

Information Technology Intern | January 2026 – July 2026

- Supported the company's Azure Landing Zone initiative by assisting in developing reusable Azure Bicep and PowerShell solutions to standardize and automate VM deployments, reducing manual effort and configuration drift while improving consistency, scalability, and security.
- Supported IAM across Active Directory and Microsoft Entra ID by managing Microsoft 365 licensing, security groups, role assignments, enterprise application access, and Microsoft 365/Exchange administration, helping enforce appropriate access through Zero Trust principles.
- Provisioned Windows Server infrastructure and deployed Microsoft Exchange Server SE, including SMTP configuration and mail-flow testing, helping maintain reliable email operations and prepare for future Microsoft 365 mailbox migration.
- Resolved hardware, software, network, account, and access issues through Revelation ITSM, completing 1,500+ tickets in six months while helping maintain approximately 99% customer satisfaction and on-time ticket completion.
- Participated in weekly security health reviews covering Entra ID activity, MFA adoption, VPN access, privileged accounts, suspicious sign-ins, and security alerts, helping identify risks and strengthen the organization's overall security posture.

Projects

Azure VM Deployment Automation & Standardization Framework

Associated with Fabick CAT | Summer 2026

- Assisted in developing a reusable Azure Bicep and PowerShell IaC framework to standardize VM deployments with Entra ID validation, governance controls, private networking, CyberArk PSM access, and Azure Virtual WAN connectivity, reducing configuration drift and supporting future Azure DevOps CI/CD automation.

Microsoft Entra ID Identity and Access Management Lab

Independent Project | 2026

- Built and administered a Microsoft Entra ID lab environment to practice identity lifecycle management, Conditional Access, MFA, RBAC, PIM, and security log analysis while applying Zero Trust and least-privilege principles.

Technical Skills

-
- **Cloud & Infrastructure:** Microsoft Azure, Azure Bicep, PowerShell, Azure Cloud Shell, Infrastructure as Code (IaC)
 - **Identity & Access Management:** Microsoft Entra ID, Active Directory, RBAC, Privileged Identity Management (PIM), Conditional Access, MFA, Identity Protection, Access Reviews, Entitlement Management, Hybrid Identity
 - **Security & Monitoring:** Microsoft Defender, Security Monitoring, Security Alert Analysis, Security Health Reviews, Identity and Sign-In Monitoring, ISO/IEC 27000 Series, NIST CSF, CVE, CVSS
 - **Programming & Scripting:** Python, Java, Bash
 - **Networking & IT Operations:** Network Troubleshooting, IT Operations, IT Service Management (ITSM)
 - **Tools & Technologies:** Azure Portal, Entra Admin Center, Active Directory (ADUC), Microsoft 365 Admin Center, Exchange Admin Center, Proofpoint, Revelation ITSM, Virtual Box, Wireshark, Visual Studio Code, Git/GitHub

Leadership Experience & Activities

Information Technology & Cybersecurity Club | St. Louis, Missouri

School Organization – Marketing Officer | Fall 2024 – Present

- Designed promotional materials and coordinated with club officers, faculty, and industry professionals to increase engagement in technical events, guest-speaker sessions, and hands-on labs.
